

Cowes Secondary School competition

I do not support this bid. It does not offer any hope of continuing all the work we have done with the Pathfinder approach and would put our new build at risk. From detailed research analysis of its claims to have a track record of success then close examination reveals that this is not the case. It also does not have any eye to detail as it constantly claims to have organisations as partners and publishes this when in fact this is not true. This bid will take us backwards.

I do support this bid. It has proven educational expertise which offers the best chance of continued success. It protects the BSF OSP new build and will ensure that there is both a learning centre and a Gateway building. There is much local and community involvement in this bid which will ensure that the school sits at the heart of its community and is well placed to respond to the changing needs. Going with this bid takes us forwards not backwards.
